 - **CN Shiacolas Group of Companies** (CNS Group), 49% share, is diversified in Telecommunications, Land Development, Trading, Natural Resources, Hotel & Tourism and other sectors

About Cablenet

Company Information

- Employs more than 250 people in Nicosia, Limassol and Larnaca
- Developed the only wholly-owned independent network in Cyprus
- 40 Gbps International Capacity over redundant submarine cable systems
- An investment of more than €45 million
- More than 60,000 home active subscribers
- More than 4,000 business active clients

The National Network

Cablenet operates a privately-owned Hybrid Fiber Coaxial network, using the latest DOCSIS 3.0 cable technology offering **#fiberpower**® high speed Internet, fixed telephony and digital video service delivering multiple high-definition (HD) channels.

The backbone optical fiber network within Cyprus is fully redundant and interlinks the four major cities in Nicosia, Limassol, Larnaca and Paphos both at IP level as well as SDH.

Multi-fiber metro rings are in operation in major civic centers in Cyprus, providing redundancy. Cablenet operates multiple major Point of Presence in Cyprus, each interconnected with a state-of-the-art multi-10G self-healing ring, taking resilience and performance to a whole new level for Cypriot standards. Furthermore, Cablenet has presence with resilient multi-homed connectivity in the two major landing stations in Cyprus, as well as, key co-location facilities.

The International Network

Cablenet owns diversified submarine capacity over multiple submarine Cable Systems. The network capacity is terminated in key European locations, **London, Frankfurt, Marseille and Athens**, where Cablenet operates its own Points of Presence (POPs).

In addition to the very strong assets in submarine capacity, Cablenet operates a fully redundant, self-healing ring in mainland Europe, connecting London, Frankfurt and Marseille with multiple 20 Gbps capacities.

Cablenet is a member of major European Internet Exchanges, **LINX, DE-CIX and AMS-IX**, with physical presence. It directly peers with over 500 providers from over 52 countries worldwide. This ensures the lowest latency for Internet destinations, as traffic gets handed over to the destination network directly therefore skipping intermediaries.

What Cablenet offers @Business

(<http://www.cablenetbusiness.com.cy>)

- Business Internet
- Networking Solutions (National connectivity)
- Networking Solutions (Global connectivity)
- Fixed Telephony
- Hosting
- Cloud

Business Internet services

- Cable Broadband Internet up to 200Mbps download and 20Mbps upload
 - xDSL Broadband Internet up to 80Mbps download and 4Mbps upload
 - Corporate Symmetric or Asymmetric Internet over Fiber, Coax Cable or xDSL
 - IP Transit for Carriers and Large Organizations (speeds from 10M up to 10G)
-
- Unlimited traffic
 - Cost effective pricing
 - Premium Technical Support

National Networking Solutions (WAN)

- Layer-3 MPLS IP-VPN
 - Layer-2 Ethernet VPN
 - Point-to-Point Ethernet (Layer-2)
-
- Access medium: Fiber Optic, Coaxial Cable, xDSL
 - Secured & Reliable services with high QoS for passing critical data and real time applications such as voice and video
 - Cost effective pricing
 - 24/7 NOC Premium Support

Global Networking Solutions (WAN)

- Layer-3 MPLS IP-VPN
- Layer-2 Ethernet over MPLS (EoMPLS)

- Access Medium: Fiber Optic, Coaxial Cable, xDSL
- High scalability
- Service performance guarantee via a comprehensive SLA
- Cost effective pricing
- Single Point of Contact (SPOC)
- 24/7 NOC Premium Support

Fixed Telephony services

- SIP Trunk over Fiber Optic, Coaxial Cable, xDSL
 - ISDN PRI & BRI
 - Analogue PSTN over Coaxial Cable, xDSL
 - Special Numbers (700 personal, 777 single, 800 toll-free)
 - Hosted PBX Telephony
-
- Excellent voice quality
 - Reduced telephony rates, up to 30% less than the incumbent's rates
 - Premium Technical Support

Hosting services

- Shared Website and FTP hosting
 - Virtual Server hosting
 - Collocation services
 - Email Domain hosting
 - Domain Name hosting
-
- ❑ Excellent quality and affordable prices
 - ❑ Uninterruptable and Fault-tolerant environment

Cloud Services

- **Hosted Exchange Email**
- **Web Hosting**
- **Cloud Server**
- **miniVPS**
- **Cloud Backup**
- **DNS Reg./Hosting**

- On-the-fly development and changes to services via the use of a self-service control panel
- Built-in reliability, minimisation of errors and proper monitoring
- Tiered services allowing for modifications at the click of a button
- Ease of use without major initial investments in equipment, software licenses or execution
- Reduced workload for IT as it no longer manages the main platform and its infrastructure
